Summary

Computer Science (AI) undergraduate building backend and AI systems with Java, Spring Boot, Python, FastAPI and LangGraph. Experienced in event-driven and distributed services (Kafka, Redis, PostgreSQL), RAG pipelines and MCP integrations, with Docker/Kubernetes deployment.

Education

GL Bajaj Institute of Technology and Management Sep. 2023 - May 2027
B.Tech in Computer Science (Artificial Intelligence) *Greater Noida, India*

Relevant Courses: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Artificial Intelligence

Experience

R.S. Infotech (Finngrow) Jul. 2026 - Sep. 2026
Software Development Intern *Spring Boot (API integration), React, JavaScript, Vite, PostgreSQL, Capacitor*

- Integrated a React/Vite client with 9 Spring Boot JWT authentication endpoints (OTP, MPIN, login, refresh, forgot-MPIN, logout), handling Bearer-token storage, HTTP 423 account-lockout and server error states.
- Contributed to FinGrow, a business accounting app, by developing its 5-screen authentication journey (activation, OTP verification, MPIN creation, login, forgot-MPIN) with react-hook-form and zod validation.
- Built 4 ledger and reporting screens (dashboard, party search, date-range statement, reports) with TanStack Query caching, CSV export and a print view over a mock API mirroring planned response shapes.

Projects

PRSense AI | github.com/ansh62949/prsense-ai | Live Demo 2025 - Present
Repository-Aware AI Code Review Platform *Java, Spring Boot, FastAPI, LangGraph, RAG, pgvector, PostgreSQL*

- Designed a Spring Boot orchestration layer in front of a Python FastAPI service, exposing a 4-agent LangGraph PR-review pipeline (security, architecture, style, test coverage) through versioned, OpenAPI-documented REST APIs.
- Indexed code snapshots in PostgreSQL + pgvector (HNSW, cosine similarity) for repository-aware RAG retrieval across PR diffs.
- Triggered async reviews from GitHub Webhooks via FastAPI BackgroundTasks, keeping the 2 services independently deployable.

HerRide | github.com/ansh62949/herride | Live Demo 2025
Real-Time Women-Centric Ride-Hailing Platform *Java 21, Spring Boot, Kafka, Redis GEO, PostgreSQL, WebSocket, JWT*

- Architected an event-driven backend on Apache Kafka with 4 topics (trip.requested, accepted, completed, sos), decoupling ride matching, notifications and SOS escalation from the request thread.
- Implemented nearby-driver discovery with Redis GEO (GEOADD/GEORADIUS), serving driver location pings every 8 seconds within a 5 km radius and avoiding SQL geometric table scans.
- Secured REST and STOMP WebSocket endpoints with Spring Security JWT (access + refresh rotation); streamed Kafka-triggered SOS alerts over WebSockets; added Swagger docs and Prometheus/Grafana monitoring.

FlowInbox AI | github.com/ansh62949/FlowInbox | Live Demo 2026 - Present
AI-Native Email & Workflow Automation Workspace *FastAPI, LangGraph, MCP, PostgreSQL, Redis, Qdrant, Kubernetes*

- Orchestrated LangGraph email agents (4 analysis signals) with hybrid RAG (Qdrant + PostgreSQL full-text search fused via RRF); exposed tools to Claude Desktop and Cursor via MCP (stdio, HTTP/SSE).
- Deployed an async FastAPI backend (SQLAlchemy 2.0, Pydantic v2) to a 5-service Kubernetes cluster with Docker; GitHub Actions CI/CD runs 16 Pytest cases and publishes GHCR images.

Technical Skills

Languages: Java, Python, SQL, JavaScript
Backend & Distributed Systems: Spring Boot, Spring Security, REST APIs, JWT, WebSockets, FastAPI, Microservices, Event-Driven Architecture, Kafka, Redis
AI / GenAI: LangGraph, Multi-Agent Systems, RAG, Hybrid Retrieval (RRF), MCP, pgvector, Qdrant
Databases & DevOps: PostgreSQL, MySQL, Docker, Kubernetes, GitHub Actions, CI/CD, Git, Linux

Achievements & Certifications

- Solved 300+ DSA problems on LeetCode across Arrays, Trees, Graphs, DP, and Greedy.
- Selected for Round 2 of Hack the Globe 2026 (GlobalSpark).
- Hugging Face Agents Course — Certificate of Excellence, Sep. 2026.
- Claude Academy — Claude Code in Action, Sep. 2026.
- Walmart & HPE — SWE Virtual Experience Programs (Forage), Feb. 2025.
